Disclaimer / Warranty Waiver For Wood Shutters installed on Sliding Glass Doors

The standard panel configuration for Wood Shutters installed on a sliding glass door is designated as 1L-1R-T-1L-R as illustrated in the picture and shop drawing below:

This standard is defined by the manufacturer for the even weight distribution of the shutter panels and maximum strength of the shutter frame. Bi-folding shutter panels together creates additional weight, and could cause the panels to sag. Any request to deviate from the Standard Panel Configuration will be subject to the customer waiving the warranty on that particular shutter.

Customer acknowledges and agrees to waive the warranty for the shutter(s) on the sliding glass doors specified.
