## Disclaimer for Hunter Douglas Silhouette ® Window Shadings

Silhouette ® Window Shadings have inherent characteristics that every buyer should know before purchasing.

Edge Light Gaps, All Inside Mount Applications (from window opening edge to fabric)

- Control Side - 5/8"
- Free Side - 1/2"

Due to variations in dry-walled window openings, the Edge Gaps will vary depending on the degree of variation of the window opening.

### Vane Closure

When the vanes of a Silhouette shading are closed, they overlap each other, blocking the view. However, the vanes do not contact each other along the full length of the shading – they do not form a perfect seal against light leakage. This is most visible toward the bottom of the shading.

Customer acknowledges they have read and understand the above characteristics as inherent characteristics of Silhouette ® Window Shadings.
