Disclaimer / Waiver for 2" Wood Blinds

Customer acknowledges that 2 " wood blinds are a natural wood product. Customer also acknowledges that 2" wood slat material is not "perfectly" straight and is subject to vary in color and grain from slat to slat. Wood blinds are not water-proof. If wood blinds are installed in an area where there is a risk of exposure to moisture, such as over a kitchen sink or in a bathroom over a tub or shower, it is likely that the blinds will get wet and the paint or stain finish will peel away from the slat material. Customer acknowledges that this will not be covered by any warranty from the manufacturer, R & B Enterprises or the homebuilder.

For windows that are wider than 72" or have a greater area than 35 square feet, the manufacturer recommends making blinds for these windows using multiple blinds on 1 headrail. This is due to the heavy weight of the blind and an increased possibility of warpage. This can be done as a "2-on-1 headrail" or "3-on-1 headrail" blind. Should the customer request blinds larger than the above specifications to be made as a 1-piece blind, the customer acknowledges that the blind will not be covered under any warranty from the manufacturer, R & B Enterprises or the homebuilder.

Wood blinds are not recommended for sliding glass doors. Should the customer request wood blinds for sliding glass doors, the customer acknowledges that the blinds will be heavy to pull up and they will have to be manufactured as a "2-on-1 headrail" as mentioned above. Due to the size of a wood blind covering a sliding glass door, the customer agrees to waive any warranty for the blind(s), from the manufacturer, R & B Enterprises, or the homebuilder.
